Mid South Synergy Strengthens Standby Power for Water Resources in Montgomery County

The Montgomery County area of our service territory still remains without full transmission power from Entergy-Texas. To maintain our strong commitment to our customers with good service during this emergency situation, Mid South took delivery of additional standby generation equipment from Lynntech in Bryan-College Station. "We are overwhelmed and very thankful for corporate commitments from firms such as Lynntech helping out a power utility in need", said Mid South's Jeff Murski. Lynntech has made available a large diesel generator to help support our water and wastewater resources facilities we operate in Montgomery County. Providing quality water and wastewater resource services to our customers is vital in this time of emergency said Mid South's Mike McDougald. With help from Lynntech we will be better able to continue our services to our customers.

Mid South Synergy is a Touchstone Energy electric cooperative serving just under 17,000 members in Grimes, Brazos, Madison, Walker, Montgomery and Waller Counties. Please visit our website at www.midsouthsynergy.com

Touchstone Energy is a national alliance of local, consumer-owned electric cooperatives providing high standards of service to customers large and small. More than 640 Touchstone Energy cooperatives in 46 states are delivering energy and energy solutions to approximately 22 million customers every day. Touchstone Energy cooperatives serve their members with integrity, accountability, innovation and longstanding commitment to communities.
